HELP STOP THE SPREAD OF INVASIVE SPECIES.

Our forests are threatened by nonnative insects and diseases. Many of these pests can be transported long distances on firewood. Once transported to new areas, these invasive species can become established and kill large numbers of trees and shrubs.

HOW YOU CAN HELP:

When buying firewood for camping or home use:

- Do not move firewood from location to location.
- Obtain firewood from a source local to your home or camping destination.
- Buy or collect only what you will need, and burn responsibly.
- For local firewood providers or information on key questions to ask when buying wood go to **www.firewood.ca.gov**.

BUY IT WHERE YOU BURN IT.
